PROJECTS

GitHub repo: <https://github.com/pratikb2805>

• EMR Manager

- EMR Manager is a simple solution for managing medical records, patient information, appointments, medicine database, etc. Created with Flutter, it can be installed on Windows, MacOS or Linux.
- Tech-stack : Flutter, ObjectBox DB.

• WindHack

- A project which employs time-series forecasting and gradient boosting to predict output from a wind turbine for the coming time can predict power output for coming 1 hr upto 72 hrs
- Tech-stack: PyTorch, CatBoost , Flask.

• ML-Library

- ML-library contains separate modules containing classes implementing different machine learning algorithms from scratch namely Linear regression, Logistic regression, MLP, K-Means clustering, KNN, etc.
- Tech-stack : Python, NumPy, Pandas.

COURSES AND CERTIFICATIONS:

(Certificates [here](#))

- **Convolutional Neural Networks** by Deeplearning.ai
- **SQL for Data Science** by UC Davis
- **Web Application Technologies and Django** by University of Michigan
- **Deep Neural Networks** by Deeplearning.ai.
